## MecWise™ Inventory

The purpose of Inventory is to record the cost and movement of goods. MecWise® Inventory Subsystem is designed to maintain master records, perform inventory control, on-screen inquiry, generate inventory reports and other functions supporting the administration of stock.

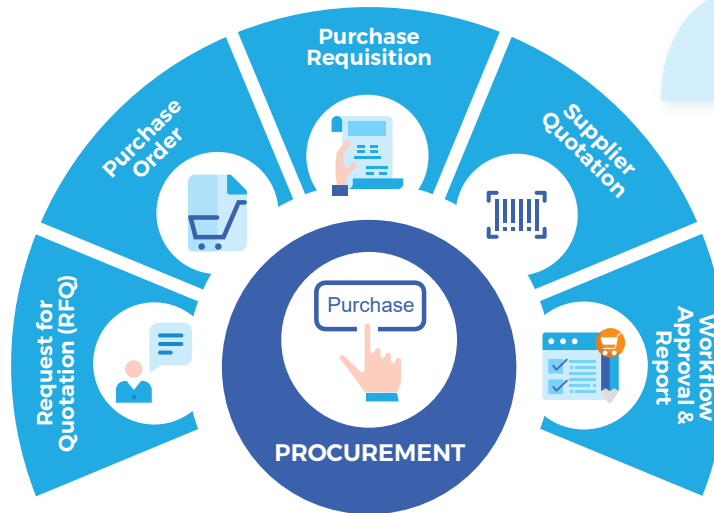

System generates various inventory reports for management analysis about inventory sales and turnover performance. From the system users can identify performance of inventory items without much delay and have better control over your current assets.

## Features

- ◀ User defined method of costing – Weighted Average, FIFO or Standard Cost
- ◀ Update Inventory records automatically for goods received, stock transfers, returns and adjustment
- ◀ Multi-warehouses stock control and online screen displayed.
- ◀ Inventory movement report to keep track of physical
- ◀ Online enquiry to find out the Stock level and the movement.
- ◀ Inventory Posting to calculate Cost of Goods Sold automatically based on account setting.

## Inventory

## MecWise™ Procurement

The Purchase Order (PO) module allows users to capture item information in order to purchase necessary inventory items.

The followings are general features of the Purchase Order (PO) module.

## Features

- ◀ System allows users to key information like an ordinary invoice, but the amounts will not be reflected in any GL Account.
- ◀ System allows documents to be keyed-in in other currencies.
- ◀ System allows users to enter supplier information.
- ◀ System will generate with necessary GST/SST details when users specifies which items are to be included GST/SST.
- ◀ In an event where related documents do not exist, users can select the item from a help button beside the part group or code.
- ◀ System will pull information from Masterfile so users do not need to key in the information.
- ◀ System will recalculate Total Amount if there is a change in Quantity or Unit Price.
- ◀ System allows users to key dimension of items

## MecWise™ Fixed Assets

Fixed Asset (FA) module is designed to help monitor fixed assets of the organization, accounting for and managing their fixed assets. The main objective of module is to provide complete management control over fixed assets and to eliminate time and effort normally associated with this task.

The module serves as an asset register and monitoring tool for tracking maintenance agreements.

## Features

- ◀ Provides a complete inventory of fixed assets, including location code and asset group code
- ◀ Provides 3 most common depreciation methods that can be specified for an asset
- ◀ Schedules for maintenance service, as well as monitor repair of fixed asset details
- ◀ FA module automatically calculates amount of depreciation to be expensed for each asset
- ◀ Other automatic transactions are generated whenever new assets are added, disposed, reclassified or adjusted

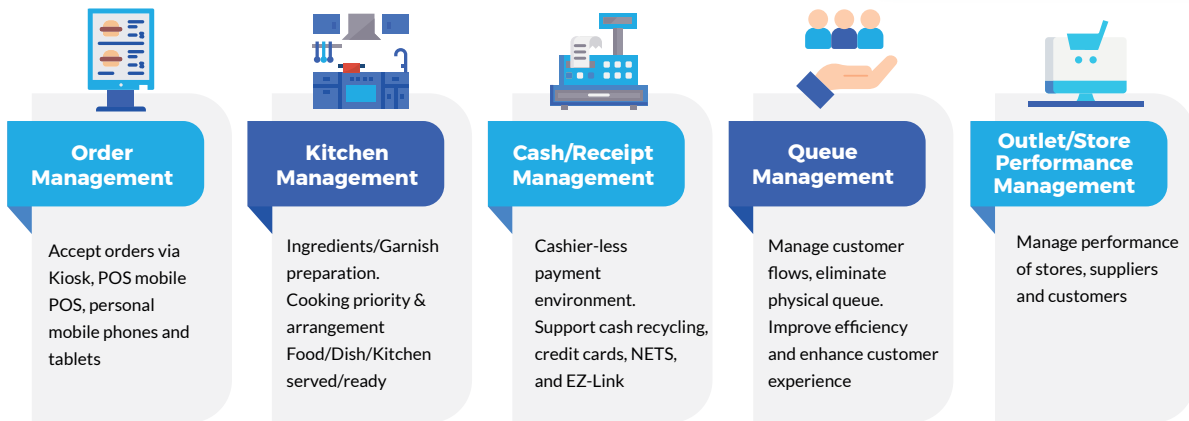

## Fixed Assets

**MecWise™**  
Point of Sales (POS)

Integrated COMPLETE solution for F&B
